Dog Vaccine Program

We recommend that all dogs be vaccinated against: Distemper, Hepatitis, Parvo, Leptospirosis (**DHP**)/(**DHLP**) and Bordatella (kennel cough) and Parainfluenza internasal (**BV/PI3**). We also have available **Lyme's** Vaccine, **Leptospirosis** Vaccine and **Rattlesnake** Venom Vaccine for those dogs living in high risk areas. We feel that these vaccines will be of great value in protecting your puppy or dog. Certain breeds- such as Rottweilers and Dobermans may require additional Parvo vaccine as recommended by our doctors. We do not recommend Small dogs under 10 lbs be vaccinated for Leptospirosis.

Puppy Vaccine Protocol

8 weeks	DHLP or DHP, fecal, worming
12 weeks	DHLP or DHP, BV/PI3 IN, fecal, worming
16 weeks	DHLP or DHP, BV/PI3 IN, Rabies fecal, worming
20 weeks	Rabies
6 months - optional	Rattlesnake
7 months – optional	Rattlesnake

These vaccinations should be boosted 1 year later. Heartworm prevention is started prior to 16 weeks of age. Heartworm testing is done at 1 year of age.

Adult Dog Vaccine Protocol

Annual examination is required

Annually	Lepto, BV/PI3 IN, Heartworm test, fecal worming
Every Spring	Rattlesnake (not given with other vaccines)
3 years	DHLP or DHP, Rabies

No vaccine can be given within 2 weeks of any other vaccine.
Booster shots must be within 6 weeks of original vaccine.

Recommended for all dogs: Heartworm prevention - Sentinel or Interceptor
Flea Control – Sentinel, Capstar, Comfortis or Advantix
Tick Control – Advantix, Preventic Collar or Frontline Spray

Cat Vaccine Program

We recommend that cats be vaccinated against Panleukopenia, Calicivirus, Rhinotracheitis virus, **(FVRCP)**, which affords distemper and viral cold protection, Rabies **(RV)** and testing for Feline Leukemia/Feline Immunodeficiency Virus **(FELV/FIV)**. This is done by a simple blood test. We recommend that the testing be done prior to vaccination.

Kitten Vaccine Protocol

8 weeks	FVRCP, worming, fecal
12 weeks	FVRCP, FELV, FIV Test, FELV vaccine, worming
16 weeks	FVRCP, Rabies, FELV vaccine, worming, fecal
20 weeks	Rabies

Adult Cat Vaccine Program

Annually	FELV Vaccine, Rabies, worming, fecal
3 years	FVRCP

No vaccines can be given within 2 weeks of any other vaccine.
Booster shots must be within 6 weeks of original shot.

Recommended for all cats:

- Heartworm prevention - Advantage multi or Interceptor every month
- Flea Control - Program Injections every 6 months
- Tick/Flea Control - Frontline Plus Spray or Topical Spot on
