Vaccinations Services & Programs

Puppy & Adult Dog Program

We recommend that all dogs be vaccinated against: Distemper, Hepatitis, Parvo, Leptospirosis **(DHP/DHLP)** and **Bordatella** (kennel cough)and **Flu.** We also have available **Lyme's Disease Vaccine** and **Rattlesnake Venom Vaccine** for those dogs living in high risk areas. We feel that these vaccines will be of great value in protecting your puppy or dog. *Certain breeds- such at Rottweilers and Dobermans may require additional Parvo vaccine as recommended by our doctors.*

Puppy Program

8 weeks of age	DHLP or DHP, Deworming, Fecal
12 weeks of age	DHLP or DHP, BV Intraoral, Flu, Rabies,Deworming, Fecal
16 weeks of age	DHLP or DHP, BV Intraoral, Flu, Rabies, Deworming, Fecal BV #2, RV
20 weeks of age	Rattlesnake, Lyme Vaccine
24 weeks	Rattlesnake, Lyme Vaccine

These vaccinations should be boosted 1 year later. Heartworm prevention is started prior to 16 weeks of age. Heartworm testing is done at 1 year of age.

Adult Dog Program

Annual examinations are required

No vaccine can be given within 2 weeks of any other vaccine.
Booster shots must be within 4-6 weeks of original vaccines.

Yearly	Lepto, BV Intraoral, Heartworm test, Fecal, And Deworming
Every Spring	Rattlesnake ,Lyme and Flu Vaccine
Every 3 years	DHLP or DHP, Rabies

Kitten & Adult Cat Program

We recommend that cats be vaccinated against Panleukopenia, Calicivirus, Rhinotracheitis virus, **(FVRCP),** which affords distemper and viral cold protection and Rabies **(RV).** Testing for Feline Leukemia/Feline Immunodficiency Virus **(FELV/FIV)** is also recommended no sooner than 12 weeks of age. This is done by a simple blood test. We recommend that the testing be done prior to vaccination.

After a negative test result, the **FELV** vaccine is recommended.

Kitten Program

8 weeks of age	FVRCP, Fecal, Deworming
12 weeks of age	FVRCP, Rabies, FELV test, FELV vaccine Fecal, Deworming
16 weeks of age	FVRCP, FELV vaccine,Deworming

These vaccinations should be boosted 1 year later.
Heartworm prevention is started prior to 16 weeks of age.

Adult Cat Program

Annual examinations are required

No vaccine can be given within 2 weeks of any other vaccine.
Booster shots must be within 6 weeks of original shot.

Yearly	Rabies, Deworming, Fecal
Biennial (every 2 years)	FELV
